Software Developer | Frontend Specialist

Portfolio & selected work → **brianyoung.dev**

Frontend-focused software developer with 10+ years building digital products, including 6 years in enterprise e-commerce. Builds accessible, SEO-conscious experiences with React, Next.js, TypeScript/TSX, JavaScript, and Node.js. Combines frontend engineering with visual design, logo, and video experience to turn Figma designs into production interfaces and reusable components.

TECHNICAL SKILLS

Frontend	React, Next.js, TypeScript/TSX, JavaScript, HTML, CSS, SCSS, Tailwind CSS, Pug templates and mixins, design tokens
Engineering	Full-stack development (Node.js, REST APIs, SQL), frontend architecture, component design, accessibility (ADA/WCAG), SEO, Agile/Scrum, code reviews
Platforms & Tools	HCL Commerce, Contentstack CMS, Google Cloud Platform, Git, Postman, Jira, Figma, Searchlight, Adobe Creative Cloud
AI Workflows	Claude Design, Claude Code, Cursor, agentic workflows, MCP integrations, AI-assisted implementation, design-to-code workflows

PROFESSIONAL EXPERIENCE

Frontend Web Developer — October 2020 – July 2026

Tailored Brands (Men's Wearhouse & Jos. A. Bank)

- Built and maintained omnichannel frontend experiences for two enterprise retail sites using React, Next.js, TypeScript/TSX, JavaScript, Node.js, SCSS, HCL Commerce, and Contentstack.
- Created reusable promotional components and frontend patterns that supported frequent merchandising changes and made implementation more consistent across campaigns.
- Developed high-visibility homepage experiences, including a promotional placement with roughly **156,000 weekly impressions** and global utility messaging reaching up to **46,000 daily exposures**.
- Championed cleaner UI and video content integration to improve the customer shopping experience.
- Built JavaScript-driven banners with URL and product-filtering logic to tailor product displays to campaign requirements.
- Translated Figma designs into responsive interfaces, accounting for accessibility, SEO, brand consistency, and performance; partnered with product, design, marketing, and QA through release.
- Contributed to the Men's Wearhouse replatform squad through sprint planning, implementation, and code reviews.
- Provided production support, including after-hours issue resolution in partnership with a global QA team.
- Guided three developers within a **10-person engineering team** and used Cursor, Claude Code, and MCP-based workflows to speed implementation while reviewing and testing the resulting code.
- Supported e-commerce initiatives as online sales grew **17% year over year in FY2025** and 5% in Q1 2026.

EARLIER EXPERIENCE

Founder, **Web Designer & Developer** — 2017 – 2020

Battersea Creative

- Designed, built, and managed official sites for **Sloan**, **The Jesus and Mary Chain**, **Fountains of Wayne**, and Ivy music sync.

Web Developer — 2014 – 2017

Vendaria — Seattle, WA

- Developed and maintained web interfaces in a startup environment, working across design, business, and technical teams.

Staff Producer / Audio Engineer — 2011 – 2014

Battersea Productions

- Managed recording projects from planning through delivery, collaborating with artists, management, and production teams.

EDUCATION

General Assembly — *Full Stack Software Engineering Certificate* — Los Angeles, CA

Dick Grove School of Music — *Artist Associate* — Studio City, CA

Yavapai College — *Associate of Arts, Graphic Design* — Prescott, AZ
