

# BRIAN YOUNG

Software Developer | Frontend Specialist

347-637-8670 | bdy-dev@proton.me | brianyoung.dev

Frontend-focused Software Developer with 10+ years of experience building digital products, including 6 years in enterprise e-commerce. Builds accessible, SEO-conscious web experiences using React, Next.js, TypeScript/TSX, JavaScript, and Node.js. Uses Claude Design, Claude Code, Cursor, agentic workflows, and MCP integrations to explore design ideas and accelerate development. Brings visual design, logo creation, and video editing experience to frontend work, translating Figma designs into production-ready interfaces in collaboration with product, design, marketing, QA, and engineering teams.

## TECHNICAL SKILLS

|                          |                                                                                                                                                                           |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Frontend & Development   | React, Next.js, TypeScript/TSX, JavaScript, Node.js, Pug Templates & Mixins, HTML, CSS, SCSS, Tailwind CSS, Design Tokens & Internal Design Systems                       |
| AI Development Workflows | Claude Design, Claude Code, Cursor, agentic workflows, MCP integrations, AI-assisted implementation, design-to-code workflows                                             |
| Platforms & Tools        | HCL Commerce, Contentstack CMS, Google Cloud Platform (GCP), Git, Postman, Jira, Figma, Adobe Creative Cloud, Searchlight                                                 |
| Engineering Practices    | Frontend Architecture, Component Design, Full-stack Development, REST APIs, Accessibility (ADA/WCAG), SEO Best Practices, Agile/Scrum, Code Reviews, Technical Mentorship |
| Additional Technologies  | SQL                                                                                                                                                                       |

## PROFESSIONAL EXPERIENCE

Software Developer | Frontend Specialist

October 2020 – July 2026

Tailored Brands (Men’s Wearhouse & Jos. A. Bank)

- Developed and enhanced enterprise omnichannel e-commerce experiences supporting large-scale retail platforms for Men’s Wearhouse and Jos. A. Bank.
- Leveraged Cursor, agentic workflows, and MCP integrations to accelerate development, rapidly translate designs into production-ready code, and improve engineering efficiency.
- Built modern, scalable, and maintainable web applications using React, Next.js, TypeScript/TSX, JavaScript, Node.js, SCSS, and CSS.
- Translated Figma designs into responsive interfaces while maintaining brand standards, accessibility requirements, and SEO considerations.
- Contributed to the Men’s Wearhouse replatform engineering squad through Agile sprints, Jira story planning, code reviews, and cross-functional collaboration.
- Created reusable frontend patterns, components, and architecture improvements that increased maintainability and development efficiency.
- Developed and maintained high-visibility homepage promotional experiences generating more than **156,000 weekly impressions** through dynamic merchandising and campaign content.

- Built and maintained reusable global utility components supporting free-shipping messaging and promotional campaigns reaching up to **46,000 customer exposures daily**.
- Improved digital experiences through UI enhancements, merchandising improvements, ADA considerations, and SEO initiatives.
- Provided production support, including after-hours issue resolution and collaboration with global QA engineering teams.
- Mentored developers and provided technical guidance within a **10-person engineering team**.

#### **Selected Impact**

- Contributed to initiatives supporting 17% year-over-year online sales growth in FY2025 and 5% year-over-year growth in FY2026.
- Championed cleaner UI experiences and video content integration to improve the customer shopping experience.
- Supported high-visibility commerce experiences serving significant customer engagement across enterprise e-commerce platforms.

#### **Web Developer**

2014 – 2017

*Vendaria — Seattle, WA*

- Developed and maintained web experiences in a startup environment, collaborating across design, business, and technical requirements.
- Built and supported frontend interfaces while gaining hands-on experience with digital product development and evolving web technologies.
- Worked independently and collaboratively to solve problems, manage priorities, and deliver web projects in a fast-paced environment.

#### **Staff Producer / Audio Engineer**

2017 – 2020

*Battersea Productions*

- Managed end-to-end production workflows for professional recording projects, coordinating technical requirements, timelines, resources, and final deliverables.
- Collaborated with artists, management teams, production staff, and external stakeholders to execute complex creative projects.
- Developed and maintained technical production workflows using digital production tools and recording technologies.
- Managed independent project execution from concept through completion, including planning, scheduling, resource coordination, and quality control.

### **EDUCATION**

#### **General Assembly**

Los Angeles, CA

*Full Stack Software Engineering Certificate*

Completed an intensive software engineering program focused on full-stack web development and modern software development practices.

#### **Dick Grove School of Music**

Studio City, CA

*Artist Associate*

#### **Yavapai College**

Prescott, AZ

*Associate of Arts*
